

SAFETY FLASH: CREW CHANGE

GOOD PRACTICE

- 👍 Make clear arrangements regarding the location of the crew change.
- 👍 Pay attention when choosing the location, whether cars can be exchanged and which other materials can be transferred on and off board.
- 👍 Report the arriving and departing crew at the terminal (if required).
- 👍 Use a crew change form to hand over the barge to the next crew. This gives them a clear picture of the current status of the barge.
- 👍 Mention the status of trip, maintenance, repairs, inventory, planned visits or any visitors (mechanics) and any other detail when handing over the barge.
- 👍 Wear PPE (Personal Protective Equipment) during the crew change. Safety does not end after the end of the working week.
- 👍 Take care of the accommodation. Clean and tidy up.

Terminal rules often differ per terminal. For example, the speed that can be driven and whether or not a crew change can take place. These rules are always available at the gate and often online too. Following these rules prevents problems.

BAD PRACTICE

- ✗ Not wearing PPE.
- ✗ Not abiding the terminal rules.
- ✗ Not (fully) registering the crew which causes unnecessary waiting times.
- ✗ Not communicating clearly about the current status of the barge, which makes it easy to forget about work or to do them twice.
- ✗ Leaving the accommodation messy or dirty.

ACTION QUESTIONS:

- Do we have a crew change form? How do we fill this out?
- How do we know which terminal rules are applicable?
- Which subjects about the barge status do we need to discuss?
